PREFACE

This Statistical Abstract of South Carolina was an appendix to the Economic Report of South Carolina when last published in 1970. The separation of this Abstract from the Economic Report is expected to facilitate publication of the two documents as well as aid the user who may be more interested in one or the other of the two Reports.

This printing is not intended to be an exhaustive source of statistics, but by comparing counties within South Carolina and other states with South Carolina in certain significant areas of activity, it attempts to highlight trends and significant facts in a single source.

Wherever available and possible, county data is provided to facilitate regional analysis. A great need exists for further statistical breakdown into county and even smaller geographical units. In some instances, information is also given by Standard Metropolitan Statistical Areas. In this connection Spartanburg County has recently been designated a Standard Metropolitan Statistical Area as a result of new criteria adopted subsequent to the 1970 United States Census.

Appreciation is expressed to the many State and Federal agencies as well as fellow staff members who contributed so generously to this project.
